

Setup an autocompiler for compiling text to pdf

Yingqi Jing
University of Zurich

Abstract

To compile the main.md file, you simply need to type ctrl+r. It will automatically compile the file and convert it into pdf.

1 Introduction

In order to make things work. You need to have keymapping in you vimrc file.

2 Data and Methods

This is the part for method and data. New change.

2.1 Subsection for data

This is the subsection. To test the file. New

3 Conclusions
