

# Setup an autocompiler for compiling text to pdf

Yingqi Jing  
University of Zurich

## Abstract

To compile the main.md file, you simply need to type ctrl+r. It will automatically compile the file and convert it into pdf. Whenever you exit the file, it will automatically compile the file.

## 1 Introduction

In order to make things work. You need to have keymapping in you vimrc file.

## 2 Data and Methods

This is the part for method and data. New change.

### 2.1 Subsection for data

This is the subsection.

## 3 Conclusions

This is the conclusion part. We can test whether it works. The final part. Test for autocompile.aldfkal; This is
